Why claimers of “Right of People” boycott people of Iran?

In this issue, “Damparvaran” discusses for challenges in the way of foreign exchange credits for importing grains, soya meal, corn, corn meal and all other gredients which are necessary for feed and food.

This objection is applicable, why countries and states who claim on “Rights of Humanity”, are boycotting Iranian people by stopping abroad bank facilities raw material for poultry and agriculture?

They have no right to cause shortage of food and feed for Iranian people!

In this article “Damparvaran” by support of public diplomacy, the call of vigilant consciences of the world is announce that: “The boycotting of food for people of Iran seriously should be stopped. otherwise it causes for Iranian people lack of food. Shortage of raw material and hungriness.

Five idea, Five solution

Here is represented five riew by poultry industrie`s experts in our present situation.

The first view: in present crisis situation, the management of production and commercial of poultry industry should shift to our state.

The second view: The market and its mechanisms are determine the range of prices and production in poultry industry; meanwhile the competition is existed yet. So the market is the controller.

The third view; Our state should transfer all the production and commercial processes to private poultry unions and societies. There is no need to interfere by the state.

The fourth view; We need the management of state parallel with cooperation of private unions and associations.

The fifth one; in the existed situations all of affairs is related directly to foreign diplomacy of our state. While facing with foreign boycottings, The private associations and unions will not be successful.

For the principle and necessary raw materials for feed production, Veterinary drugs, Vaccins, poultry and agricultural yields should be imported.
