

to visitors and experts.

However “Damparvran” for the other time acted successfully, not only in his informative and researching objects, also to obtain to newest technologies and innovations in specialized international exhibitions.

The sixth grand show of water strengths infrastructure technology once again successfully celebrated

For the sixth year, this grand exhibition celebrated with this motto “optimum use of water, raising efficiency in agriculture by means of excellent technologies”.

This important show was held in 9-12 oct, 2012 in Agriculture and Natural Resources faculty (Pardis) of Theran University.

This innovative event celebrated with cooperation, partnership and friendship presence of creditable and well-know producers, importers and exporters, with no – financial support of deputy of water, soil and industries of agricultural ministry and also agriculture organization of Alborz province with collaboration of Tehran university (Pardis).

In opening celebration of show, engineer.S.R.Sajaadi, the deputy of water, soil and industries organization refered to high quality of participants innovations .

Besides the executive manager of this grand exhibition, Mr. Mansoor Ansari Highly thanked to all of people who supported for arranging and execution of this show. he announced 1,200,000 ha farmlands have been equipped w

ith the newest irrigating technologies which 70 percent of these project have been produced by the participants of this grand show.

Egg – production reaches over 900,000 tones

The head of poultry office in jihad- e-agriculture told: “our egg production has been industrial from 50 years ago. Based on statistics the average production in 1361 was about 60,000 tones with the grade of 33. While it reached to 700, 000 tones in last year.

In the current situation. We tried to reconstruction and stopping pollution of our saloons and farms, so we are producing over than 900,000 tones eggs.

Egyptian delegating tour request for importing the Iranian fertilizer and compost

The head of Importers and exporters unity, Mr. Noorani announced: “The Egyptian group in visiting Iran, requested for investing in petrochemistry of Iran”.

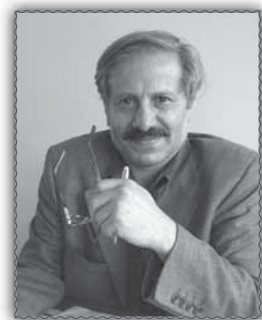

“They represented their willing to improve and more cooperation in tourism between two countries”.

Noorani told: “We are arranging for exporting vegetable like apple to Egypt and importing citrous fruits to Iran”.

Agricultural goods engaged with “the war economy” or “The economical War”!?

These days it's heard some of our speakers and decision-makers use two concepts as they are the same; while they are obviously different: “The war economy” and “the economical war”.

The editorial in chief of “Damparvaran” magazine, known as a specialized journal in agricultural economy specifies the real economical situation of our country, as his object and main duty, Even if there would be no listener among our decision – makers.

These speakers talk in a way that “War economy” is just like as “economical war”. While the war economy is called when all of human forces, agriculture, industries.... are engaged with defeat and war. Just the situation which our national economy is specified to defeat aggression and our war policy.

But our existed situation is exactly “The economical war”. When many of foreign forces all around the world have decided strict sanctions against Iran, such as banking, financial, food and feed, drugs, grains and many other goods.

Now, the most important and sub-line of battle for our people's food security is our agriculture. We have to more plant and cultivate, for more food.

We have a crucial situation which should only think to articles of food, grocery needs. If we really intend no more losses and injures to our people, We should really support and strengthen our agricultural economy.

Talking of delegating tour of “Damparvaran” with ministry of agriculture of France in space – Rennes

Damparvaran's delegating tour visited the “space” exhibition “The 26th international exhibition of poultry and husbandry and cattle and related industries in rennes – paris.

This managed group also visited the highly – specialized exhibition of potato producers between Belgium and France: “the potato of 2012”.

The delegating tour of “Damparvaran” were registered in International clup; The “Space” is so important for agricultural products that ministry of agricultural organization, and other deputies and ministries and also the president of France, Fracois Hollande were attended, too.

Our delegating tour was the biggest and highly arranged in middle east groups, so two television channels of France talked with the executive manager of our group, mansoor Ansari. of course some of our group's members could talk with Mr. Stephane – Le – Foll, the ministry of agriculture of France. The well – know and pioneer in animal husbandry, Engineer. Ghalandari, form Gorgan-Iran, talked about the abilities and innovations in Iran.

In the third day, our group visited “Potato 2012” in a space of 20, ha Farmland. All of combines, machineries and vehicles actually operated for showing their technology
