

to meet and share ideas with livestock farming professionals from France, Europe and the rest of the world, thanks to the wide variety of cattle on show.

SIMAGENA 2013 will feature several innovations:

- Cattle breeders' catalogue. To make it easier for French and international livestock farming professionals to find their way around the show
- The "new services and products" area will provide exhibitors with a chance to present their equipment and breeding innovations to livestock farmers.
- The genetic and genomic centre gives livestock farmers an opportunity to obtain practical information on the latest developments in the field of genomics along with advice on applying them in practice. Various breeding associations will be on hand to answer their questions.
- SIMAGENA has teamed up with a number of agri-food cooperatives and businesses to organise excursions for livestock farmers.

The FAO's representative in Tehran:

Political affairs should not interfere with agricultural expansion

The representative of food and agriculture in united nations (Fao) announced in Tehran: "Executed sanctions for vaccine and animal drugs have introduced a high level of challenges in the world."

Noor-e-din Mona added: "International sanctions have highly affected on defeating animal diseases. Health and immune agricultural products is known as the mutual Worriness in the world".

He believes that agricultural affairs should act main rule for unity of nations.

Specifying 3000 Milliard Tommans for Reducible and Complementary Industries in Agriculture

Engineer Sajadi, The deputy of water, soil, industries of jihad - e - agriculture participated in a gathering by sub - managers of industries in Iran.

He told: "By fortune, We could accomplish all expected porpuses for reducible and complemenary industries of agriculture. It occurred by good cooperation of industries sub-managers of all provinces .our statemen have granted 3000 milliard tommans for 91 projects.

Engineer poorbasir, the head of agricultural industries affairs added: "We have issued 18,520 certficate for stablishing reducible and complementary industries, which are able to processing 30 million tonnes raw materials. of course we have 2,340 projects which are known as semi - completed in our country.

Analyzing the causes of failing law in first phase

In this article, the associate manager of “Damparvaran” has analyzed the causes and effects of why the cooperative aiming law is unsuccessful and failing, and also he refers to existed inflation in our society; Inflation which has gulped and swallowed all supports which our state has granted to six weaker levels of our society.

The editorial in chief of “Damparvaran” interprets it as an economical jugglery. This inflation went ahead of purchasing power of our people.

on the other side all aspects of this law has not been accomplished. The agricultural productive activities has not supported as it was promised, while the economy of production in agricultural affairs have been weaker and out of energy.

Here he objects Majlis for their non- sufficient control on execution of first step of this law. Our state is insisting to execution of second phase of this law, so our majlis should clearly declare for our society defeating causes of first phase of this unsuccessful law.

TOGETHER, WE GROW THE WORLD!

The next SIMA – the most international trade show in the agricultural world (agricultural equipment and livestock farming) will be held in Paris - France from 24 to 28 February 2013.

The show will bring together all the key French and international players in the world of agriculture for five days at the Paris-Nord Villepinte Exhibition Centre.

Now just 10 months away, the 75th SIMA event promises to be:

UNIQUE => professionals will have the chance to explore agricultural equipment, products and services for livestock farming, large-scale farming and specialist farming along with 400 dairy and beef cattle under one roof.

The most INTERNATIONAL of the agricultural shows.

The SIMA Innovation Awards reward innovative or forward-looking agricultural equipment.

The perfect place to do business, with 67.4% of visitors making a purchase.

As an open platform, SIMA 2013 is planning a programme of conferences and workshops on topical subjects with high added value to give everyone a comprehensive view of the agricultural sector.

SIMA in 2013 will be

the key event for high-performance sustainable agriculture worldwide to help everyone – whatever their size and wherever they come from – to produce more and better!
