

SEMEX was established as a cooperative in 1960 by the sharers. Currently, this company Export its products to 80 country in 4 continent.

## Raw milk purchase begins by central organization of rural cooperative

Director general of central organization of Rural Co-operative in a visit from a dairy farm, announced: dairy farms have had a suitable trend to produce good raw milk with less than 50.000 cells and Bactria.

He added: 8.200.000 tons of raw milk was produced in last year and we hope it will be increase in next year. In many sessions, dairy farmers and processors negotiated about purchasing raw milk but agriculture ministry decided to purchase the surplus of raw milk from dairy farms in guaranteed cost.

This surplus will change to powdery milk or cream that will sell in domestic markets or export.

MR.Safaie said: About 550.000, tons of processed dairies were exported to neighbor countries, because all of them are customers for such products. About 35% of raw milk is produced by industrial dairies and the remained by rural dairies.

## Fisheries allowed to export to Russia

According to Iran Fishery organization and director of Russia veterinary organization, exporting of Iranian fisheries are allowed.

Russia T.V. announced that Iranian companies who are activated in exporting the fisheries and were introduced to Russia veterinary organization and certified in this ground can export their products to Russia.

## Oil cost reduce and it's affect on Iran agriculture

Reducing oil cost, from more than 100\$ to about 75\$ per barrel is fixed nearly.

Many of important centers in global oil markets believe that this shock is not transient because of the stormy situation in Middle-East. They forecast that any increase in oil cost to 100\$ in short term is improbable.

Because of above subjects, Iranian govenerns decided to regulate the next year budget on 75\$ per barrel. On the other hand, increasing of the currencies rates have some affects on Iran economy and reduces Iranian purchasing ability. From

25 to 30 %.

In agriculture, we are facing to two economical phenomenons: first, to buy the inputs more expensive and the second is to change the currencies in Rials to improve the agriculture sector.

Thus, oil cost reduce will affects the agriculture sector more than economy sections and will stop the evolution in agriculture sector.

## The veterinary of country will change by (Immunity + )

Shaka company, the official representative of SEMEX, Canada, inaugurated its second summit in attendance with professors, experts and some dairymen in last summer. The main object of this summit were genetical goals in Immunity+.

By this way some genetical variations will occur and animal resistance increases about 25% against diseases.

M.Rezaei Afsah, director general of Shaka company answered to a question about this technology: the technology is exclusively to SEMEX and from 22 years ago pro. Banymelard has searched on it. A few of Iranian professors are the members of a team that have worked on the project.

SEMEX has transferd the mentioned technology to Iran and we Used it as well. Just now, many of Iranian graduated work as researchers in the country and we are glad to see them.

In the name of GOD
