

ing to displace 4000 m³ of the soil and the citrus gardens among the farms. The second is disagreement of farm. The second is disagreement of farm owners and the costs that the government must pay.

All of the indemnities were paid to Farmers

Eng.M.EbrahimHasan-nejad, deputy of agriculture insurance box said: agriculture in our country is faced to many climatic risks such as flood, drought, hail, storm and many animal diseases that threat the food safety. The only way to compensate damages of these events is to use insurance functions, like any other developed countries.

After 8 months of work culture and executive team

From May 10 to 12, 2017 Karaj, near Tehran, was a meeting point for companies operating in plant production and animal husbandry at the International Field Days Iran.

After the successful export of “DLG-Feldtage” to Turkey, Romania and Russia, finally the first International Field Days was held from May 10 to 12, 2017 in Iran. The exhibition was organized by DLG e. V. (German Agricultural Society) under patronage of Ministry of Agriculture Jihad. IFWexpo Heidelberg and Barsaz Roydad Pars Co. are organizers commissioned and authorized by DLG. DLG Field Days are an established innovative platform and meeting point for farmers, consultants and producers and distributors of seeds, fertilizers, plant protection products and machinery.

Dairy Global discusses Brexit and other factors of the milk industry with Dairy UK chief executive Dr Judith Bryans (translated interview by Masoud Ansari from Oxford- England)

The ending of milk quotas in March 2015 hurled the European dairy industry into a period of chaos and uncertainty with many farmers unsure of what the future had in store. Some decided to increase their

production to compensate for falling milk prices while others decided to get out of the industry altogether. For the past 2 years dairy farmers have struggled to keep their businesses afloat meeting every new challenge head on.

Necessity to Reviewing Agricultural policies in 12th Government

It is very soon to judge about the end of 12th presidential election, but a few of candidates promise to make jobs for 5 to 6 million individual and triple the subsidies that are unbelievable.

All of the citizens and intellectual societies know about the sabotages to stop the agreement between Iran and 5+1 countries. But we forecast everything will be ended in 19 May (29 ordibehesht) and Dr. Rohani will be elected again.

In agriculture sector, most of the policies must be changed and the paradoxes remove. Because of low technology levels, compare to developed countries, our agriculture sector doesn't reach to a good efficiency level.

So it is very important for every president to think about current agriculture sector condition. If the agriculture minister will be as same as the 11th government, it is retreat.

The next government has to review all of the policies in agriculture sector.

FAO gave satellite accessories to low water countries

According to FAO representative in Iran, it launched a portal by the name of "FAO water productivity open access portal" to give satellite data to farmers to improve the water usage. By utilization this portal, the farmers can improve the water efficiency. The report said: most of the fresh water is used in last century and is in crisis in some regions of the world. The goal of this project is to cover the countries that are faced to physical and fundamental water shortage in Africa and Middle East countries. This portal measures the evaporation and transpiration of water the best way to use the water. According to FAO statistics in lieu of one degree increasing in temperature, 20% of world people face to decreasing in renewable water sources. So, FAO emphasized to act on Paris Climate Agreement

10 year delay in family farming project

FAO and rural cooperative organization technical summit was held in Amol.

According to Haraz technology said: for family farming in the country, the KHas kalay village was selected as a pilot for a project.

FAO representatives and the rural cooperative organization manager visited the Haraz improvement technology center. Noorallah Jalali, director center, described the actions to equip, renewing and uniformity of the little farms of rice in the village. In this summit one FAO representatives questioned about 10 years delay in the project.

The experts in Haraz center answered the reasons: the first is technical and engineer-
