

## 210 Dairy products of “Pegah” will exported to 18 foreign countries

The average rate export of “shire-e-Iran” industry`s products has been over than 200 million dollars, in past 3 years ago.

Now, This grand company is successfully ac-  
tivating in 16 factories for producing of: milk, milk  
powder, concentrated milk; A factory for pack-  
aging of dairy products, 2 active factory in stock  
exchange, 2 factory in the field of husbandry, 8  
commercial office, selling and marketing groups;  
meanwhile statistics figure that 30 percent of dis-

tributed milk and dairy products in all provinces is operated by this grand company.

Near to 1100 experts and specialists are employed in this grand company and also it has produced 5000 generator jobs.

The industry of “Shir – e – Iran” is continually producing 600 kind of products; It works with 1950 husbandry and farms, and has 1145 collecting center of milk and also has the responsibility of pasteurization, homogenization of milk for 60,000 farmers.

It`s notable The it`s rate of exports is over than 200 million dollars during 3 years ago for about 210 coded products which have been exported to 18 countries.

### **Engineer Safaee, managing director of Rural cooperative organization:**

“We will expand and promote agricultural joint – stock factories”

Mr. H. Safaee, managing director of Rural cooperative organization noted: “We have less productivity because there are many small agricultural farmlands, consequently we have less productivity while the rate of water and soil usage is high”

One of the most harmful factor, is dividing the authority of a large farm and between heritors of it.

Mr. safaaee suggested that for preventing from dividing farm-lands to smaller pieces, we can give our children joint stock of agricultural companies instead of inheriting them our farm-lands.

## Paralel with execution of segregation law, many questions are asked in adjusting the market

According with segregation law, The ministry of jihad-e-agriculture is legally authorized for adjusting the market of agricultural products such as: cultivation, gardening, vegetables, white meat, egg, red meat, milk and dairies, mariculture, tea, sugar, cocoon, oily seeds.

Besides according with the law of “article 16 of increasing profitability” this organization has gained issuing of all kind justification for importing all kind of goods, raw materials, ingredients needed for food industries.

So, it's obviously a huge responsibility which is delivered to this organization.

While we are facing with multi- decision making in our country, and this laws help us with this grand problem.

### **Engineer Sajjadi, deputy of water, soil and Industries: “We should essentially have more attention and give more facilities toward yeilding water”**

Deputy of water, soil and Industries evaluated The existing situation of water in Iran, and decreasing underground water sources.

He told: “We need fundamentally grant more budget and more prices for promoting and strengthening our yielding water sources; the factor which warrants our high- pressured irrigating.

We live in a semi – dried Country, because the average of raining is 250 millimeters and it`s figure is 850 in the countries of the world, the average evaporation in Iran is 2100 millimeters and this is about 700 in the world, besides only 70 percent of our coutry has 30 percents raining.

So it`s abuious that we have to lead and organize rivers toward ounderground water – sources.

In the name of GOD
